We started the weighted revolution

Founded over 30 years ago in northeast Ohio, NAO is proud to have been at the forefront of innovation, creating one of the first weighted foam bobbers. We expanded to the Carolinas in 2010, where we are currently headquartered. As a family owned and operated company, we pride ourselves on our customer service, product quality, and affordable pricing.

Our original weighted Glo Bob was designed for a simple purpose, to improve distance and accuracy when casting, and to allow customization of line depth. Currently, we still focus on innovation, customizing our products to your local needs. We are thrilled to bring our newest line of products to you.

At our core, we are driven by a simple mission: to craft durable, high-quality floats. We firmly believe that the essence of outdoor experiences lies in the quality of the gear one brings along. It's this conviction that propels us to meticulously design and create products that enhance every moment spent on the water.

B7	1 1/4" x 2 1/2"	24/BAG	19oz

Available Colors:

Fluorescent Orange, Pink, Yellow, Green, Orange & Black

Glo-Bobs Highlights

The Original "Glo-Bobs" came on the market over 50 years ago. Way ahead of its time, Glo Bobs were designed to be an ultimate casting bobber with the lead pin pushed in for a line set. With the pin out, it was a slip float. Not only did we start the weighted revolution but we had one of the first dual use bobbers invented.

- Balanced bobber
- Catches all light biters
- Casts for distance without adding extra weight to your line

Glo-Bobs Features

- Weighted bobber for easy casting
- Fluorescent colors for easy spotting in the water
- Allows bait to swim freely
- Able to use without weight as a slip float
- Foam body resilient to damage

Pat. 3084-470

Simply thread bobber with line for a Slip float or add the lead pin for the Ultimate casting bobber
